380–420 V → 12 V / 50 A · LLC DC-DC power module

Match the converter to input range, output load, conversion ratio, cooling and protection requirements.

Photograph of the reference assembly

Parameters

Input voltage	380V-420V
Output voltage options	12V
Output current	50A

Applications & selection

Load-side power conversion, distributed power and DC-bus assessment; validate the input range before use.

Voltage, current and power limits must be checked against the operating area; they are not assumed simultaneous.
Reference values support selection. Confirm final configuration and acceptance conditions in the technical agreement. A power class is not guaranteed output under every operating condition.
